Summary

I am a software engineer with over 6 years of professional experience, working mainly in backend and embedded development. I have been using Linux on a daily basis for more than 15 years, which gives me a strong foundation in system-level programming and troubleshooting. My expertise includes C, C++, Python, Bash, Rust, and TypeScript, with most of my projects focused on the network stack. I am eager to further develop my backend skills and move towards AI/ML.

Experience

2024.05 - 2025.09 · Sii Poland · Embedded C Developer

Part of a team developing and maintaining the RDE protocol in the firmware of Intel RDMA network cards.
As a side project, I learned TypeScript and developed two Visual Studio Code extensions for my team, which significantly optimized project processes.
Team size: 15.

Responsibilities:

- Developing new features
- Bug fixing
- Implementing RDE manageability

Skills: Embedded C, Windows, PowerShell, Linux, Bash, Python, TypeScript

2022.01 - 2024.05 · Sii Poland · Python Developer

Part of an international team based in Intel's Munich office. The primary objective of the project was to validate Intel GPU drivers on Linux, using Intel's GDB-oneAPI across a variety of scientific applications written in C++ with DPC++ and SYCL extensions.
Team size: 6.

Responsibilities:

- Developing a Python-based framework responsible for setting up the environment, compiling assigned applications, and running tests (via custom GDB scripts)

Skills: Python, CMake, Bash, GDB-oneAPI, Linux

2019.01 - 2022.01 · Sii Poland · Linux System Administrator

The main project goal was to validate Intel RDMA network drivers for silicon NICs under various Linux distributions (RedHat, SLES, Ubuntu, CentOS, Debian, OpenEuler, Anolis).
Team size: 6.

Responsibilities:

- Installing, configuring, and maintaining Linux operating systems
- Maintaining the automation framework (Bash, Python, Ansible)
- Running validation tests
- Reporting and tracking bugs

Skills: Linux system administration, Bash, Python, Ansible, TCL

2018.09 - 2019.01 · Natek Poland · C++ Developer

Part of a team developing C++ software for secure smartcard chips used in payment cards and identity documents.

Resposibilities:

- Code maintenance and bug fixing

Skills: C++, Windows, Cygwin

01.2015 - 07.2016 · Lodz University of Technology · Lab Technician

Resposibilities:

- System administration at experimental physics lab
- Development of face recognition application using OpenCV
- Maintaining laboratory equipment at experimental physics lab., and medical physics lab.
- Assistance during new lab. exercises design
- Supervising students in the field of preparation for the exercises and correctness of measurements

07.2013 - 09.2013 · Solaris Laser S.A. · Engineering Technician

Resposibilities:

- Laser cutting tests using new type of the laser beam control head
- Adjusting new gas laser modules
- Measurement of optical parameters of the laser beam control head
- Testing the quality of material marking using different types of heads

Education

2018 · **M.Sc. in Physics** (Optoelectronics), Lodz University of Technology
2015 · **B.Sc. in Physics** (Computational Physics), Lodz University of Technology

Publications

2015 · **Analytical Kinetic Block Model of Crystal Mother Phase Multilayer Interface**, Scientific Bulletin of Lodz University of Technology

Skills

Programming languages: C++, Python, Bash, Rust, TypeScript
Languages: English (B2)
DevOps: Docker, Ansible
DataBase: Postgres, Redis, MongoDB
